DCFC 50kW

High Performance DC Fast Charging

The Blink DCFC 50kW system is ready to serve the electric vehicles of today and tomorrow with a modular, flexible and fast 50kW charging solution.

ECONOMICAL • DURABLE • RELIABLE

Flexible and Economical

The DCFC 50kW has the world's smallest footprint for an electric vehicle fast charger, offering owners greater flexibility in the choice of installation locations.

The DCFC 50kW fits well into compact spaces and existing structures.

Being easy to install, the DCFC 50kW delivers reduced set-up costs and a faster installation time, so charging services can be offered sooner.

Durable and Reliable

The DCFC 50kW is liquid cooled which controls heat and reduces wear on internal components.

The DCFC 50kW is designed for optimal functionality over a wide range of environmental conditions, including temperature, humidity, and corrosive conditions.

The DCFC 50kW is a reliable, robust electric vehicle fast charger with an attractive design, that is easy to own and operate.

DCFC 75kW

High Performance DC Fast Charging

The Blink DCFC 75kW system is ready to serve the EVs of today and tomorrow with a balance of flexibility, power and speed.

SMART • DURABLE • RELIABLE

Powerful and Flexible

Compact enough to fit in parking layout, the 75kW DCFC solution offers owners greater flexibility in the choice of installation locations.

Beautifully designed so it fits your needs, the 75kW DCFC can amplify your brand for customer recognition and loyalty.

Faster and easier installation and set up means you can offer drivers a more powerful and faster charging experience much sooner. Modular internal components make maintenance and upgrades easy and hassle free.

Durable and Reliable

The DCFC 75kW is designed for optimal performance over a wide range of environmental conditions and site locations.

- Liquid cooled for more quiet and cooler operation
- Enclosed structure for protection of internal components
- Door and tilt safety sensors
- Optimal performance in a variety of conditions and locations

The DCFC 75kW is a smart, flexible and powerful EV fast charger, with an attractive design, that is easy to own and operate.
