Blink Dual Port IQ 200

Networked Level 2 AC EV Charging Stations

Double the charge with a smart unit and an advanced unit in half the space. The fastest charging station now has dual functionality to accommodate high density, multiple unit installation at a fraction of the cost.

FAST LEVEL 2 CHARGING • TWO NETWORKED UNITS

The Blink Dual Port configuration brings together the power and touchscreen customer experience of the Blink IQ 200 advanced charger with the cost efficiencies and ease of use of the IQ 200 smart charger.

- Deployed together as a Dual Port unit, the advanced station controls the screenless smart unit
- Starting a charge is easy with the same intuitive interface for both plugs
- Deployed on a single circuit utilizing local load management, allows for both chargers to be connected to a single 100 amp circuit
- OpenADR 2.0b certified controllable output, supporting utility demand response requests

The Blink Dual Port unit is ideal for workplace, multifamily residential, and retail locations that want to provide multiple charging stations on a single circuit.
