EV Charging for Healthcare

Medical centers, pediatric facilities, hospitals, and other healthcare providers are the leaders in public wellbeing and technology. With thousands of daily patients, staff, and visitors, healthcare organizations are vital to the health of their local communities. Offering Blink EV charging stations provide employee amenities, complement sustainability efforts, and showcase your commitment to community health.

Be a Leader for A GREENER COMMUNITY

- Provide a valuable amenity for staff, patients, and visitors
- Create loyalty and attract new patients and physicians
- Improve operational efficiencies for your ambulatory and EMS fleet
- Demonstrate leadership in adopting advanced technologies
- Earn points toward your building's LEED certification
- Help improve air quality, noise, and CO₂ emissions near sensitive communities

The Blink Healthcare Solution

Blink EV charging stations are ideal for healthcare providers offering maximum flexibility and control.

- Works on all electric vehicles (Tesla adapter may be required)
- Billing can be time-based, kWh-based, session-based, or even can be set as a complimentary benefit
- Easy payment options via RFID, the Blink Charging mobile app, and all major credit cards
- Centrally manage your EV charging stations via the Blink Network
- Text and email alerts inform EV drivers of the charging status
- Networked solution allows for full control, monitoring, and reporting of EV station usage
- Integration with Blink Fleet Management to support ambulatory and EMS fleets
- Dynamic load management allows you to maximize usage
- EV charging stations can contribute to LEED certification
- 24/7 customer service for EV drivers and station hosts
- Fully customizable pedestal wraps for branded messaging available
